

Rite-Hite® ComboShelter Enclosure.

ComboShelter™

Soft-Sided Dock Shelter

ComboShelter is specially engineered to address the unique challenges at docks that accept standard trailers as well as those with lift gates, step ledges or other rear extensions.

1 Extended projection, impactable side frames

Extended projection allows for proper sealing around liftgate and standard trailers alike. Side frames take repeated hits from off-center trailers without damage or the need for expensive steel bumpers. Poly-wrapped foam side frames give unit stability, yet can be fully compressed — immediately returning to original shape and position if impacted.

2 Reinforced fabric

Additional layer of fabric on inside of side curtains and head curtain helps prevent premature wear caused by over-penetration of trailers and curtain backlash.

3 Slim-profile side frames

11'2" (3404 mm) overall footprint allows shelter to fit in tight clearance situations. Saves cost of moving lights, signs, conduit, etc.

4 Pivoting canopy header

Protects unit from damage if trailer comes in off-center and higher than expected. Integral gutter diverts water off sides of unit.

5 Detachable side curtains

Easily removed for maintenance flexibility or to allow increased air flow on the dock. Reattach in minutes.

6 Available PitMaster™ seal

Gaps large and small beneath and around the dock leveler are sealed with optional PitMaster components, providing substantial energy savings, improving cleanliness and sanitation.

ComboShelter™ (610C)

ComboShelter side frames are impactable for long-term durability.

6"-wide (152 mm) side frames allow shelter to fit into narrow spaces.

Removable side curtains allow for maintenance flexibility.

Ultimate durability.

When sealing a variety of trailers that includes liftgates, extending the projection of the unit is only the start. To prevent wear from curtain "backlash" that occurs when standard trailers pull away from the dock, insides of the ComboShelter side curtains and head curtain are specially reinforced. Plus, stable narrow side frames provide increased flexibility and further wear protection.

Ultimate impactability.

Rite-Hite's exclusive poly-wrapped foam side frames provide ultimate impactability – remaining undamaged even after repeated hits by off-center trailers. Side frames can be fully compressed and return to their original shape and position, time after time.

Ultimate flexibility.

Narrow 6"-wide (152 mm) side frames allow shelter to fit into narrow spaces, even at high projections. This can eliminate the need for expensive repositioning of lights, signs and electrical conduit. 11'2" (3404 mm) shelter footprint stays the same, regardless of projection.

Removable, reattachable side curtains.

Easily remove, replace or change out Velcro-attached side curtains for maintenance flexibility.

Guaranteed performance.

ComboShelter delivers all these exclusive benefits, and are backed by a standard 36-month money-back customer satisfaction guarantee when ordered with premium Rite-Hite® fabrics.
